Throughout my college education, I have constantly been asked how I will apply what I learn. In recent years, it has become increasingly apparent that to do what I want to do, and do it well, I will need to go to graduate school. Receiving a scholarship award from Wings Over America Scholarship Foundation helps to advance this aim and allow me to be, as an undergraduate, a graduate program that will help me to become the best teacher I can be. In addition, receiving this scholarship award serves to further inspire me to achieve academic excellence and to motivate me to always make the most of my education.
