Receiving this award means so much to me. It means giving a small piece of what my parents have given me over so many years back to them. I like to think that this means I've done, and I am doing, something right. Receiving this scholarship, and getting an education without worrying about money means I can focus on learning and becoming someone that can help others. One day hopefully, I will be able to help heal the men and women who were hurt fighting for me.
